Introduction

Under Ontario Police Services Act (January 1, 2019) municipalities were required to develop and adopt community safety and well-being plans working in partnership with an advisory committee, including local service providers. As stated in the *Community Safety and Well-being Planning Framework – A Shared Commitment in Ontario*, “The goal of this type of community safety and well-being planning is to achieve sustainable communities where everyone is safe, has a sense of belonging, opportunities to participate, and where individuals and families are able to meet their needs for education, health care, food, housing, income and social and cultural expression. The success of society is linked to the well-being of each and every individual.”

A framework was provided through which concerns could be reviewed:

- Incident Response – critical and non-critical incident response
- Risk Intervention – mitigating situations of elevated risk
- Prevention – proactively reducing identified risks
- Social Development – promoting and maintaining community safety and well - being

Municipal staff, and representatives of the various organizations providing services to the area began to meet in January 2020. It was obvious from the outset that many of the service providers for White River were also service providers for Dubreuilville and Wawa, most based in Wawa. It was also apparent that there are many committees/tables/organizations working to improve services in the area in a collaborative manner. A decision was made to hold the initial meetings with all three communities and once local concerns were being identified and goals were being established the groups would meet separately for each community. Each community would have a separate plan developed based upon their own needs.

The COVID-19 pandemic caused a delay in the work whilst committee members worked at developing new ways of working and meeting. Meetings began again in earnest in January 2021. A virtual review of the draft plan was held in each community prior to officially accepting the plan. Due to pandemic restrictions additional in-person reviews will be held once restrictions are lifted.

MESSAGES FROM MEMBERS

**Angelo Bazzoni**

Mayor of White River

The Township of White River is a progressive, vibrant community located midway between Thunder Bay and Sault Ste. Marie in the heartland of Northeastern Ontario. White River is a great place to vacation, live, work, raise a family and retire. Our mission for the future of White River is to develop a diversified economy based on sustainable development of our natural resources, tourism and service industries. We succeed through being creative, self-reliant and taking a positive approach to the challenges and opportunities that arise.

That is why the Township has developed the Community Safety and Well-Being Plan: a number of community partners and agencies coming together to work collaboratively to address the issues facing our town, such as the housing shortage, a lack of awareness with respect to medical services available, transportation for appointments, community policing, etc. We are committed to providing programs and services to support the health and well-being of our residents, today, tomorrow and for generations to come. The plan defines objectives and actionable items on the ground. We are hoping to move from being reactionary in nature to a system which is focused on upstream, early preventative multi-sector collaborative initiatives to make our town a safe and healthy place to live for all of our citizens. The Plan will identify priority risk factors, strategies to reduce the potential risks, and set measurable outcomes. Together, we can make a change.

**Julie Roy-Ward**

CAO of White River

The Community Safety and Well-Being Plan demonstrates the ongoing commitment of many key community partners in addressing the factors that improve safety and well-being of all community members. Together, with collective expertise and determination, along with the dedication of community members, the priorities in this plan outline a successful path forward. This plan recognizes the need for continued work upstream to address the complex factors that impact the well-being of our community. Highlighting the broader systemic factors that may impact health and wellness with an equity lens is an important focus in ensuring that all have opportunity for wellness and can enjoy a safe and connected community. Connections with surrounding municipalities and community partners is integral to the upstream work needed in this plan and White River is fortunate to have strong collaborations to create healthier communities for all. This plan reflects this ongoing work together to address the needs of the community as a whole. Reflecting on the tremendous partnerships and strength of our community in addressing the pandemic and other emergencies together this past year, it is exciting to anticipate the great possibilities going forward.

MESSAGES FROM MEMBERS

**Beverly Boyd**

Coordinator

Executive Director

Wawa & Area Victim Services

It has been an interesting exercise in working with three communities in North Algoma – White River, Dubreuilville and Wawa. A decision was made early on to hold meetings with representatives of all three communities at the outset. This allowed the service providers the opportunity to go to one meeting instead of three. As work progressed the communities began to meet with the providers separately to develop their goals and actions.

Each community has its' own characteristics, strengths and areas of concern. What is noted is that they all have individuals who are committed to making their communities strong and safe. It is recognized that each community, although a separate entity, is connected to the others by a network of services –providing service as best they can with, often times, limited resources. The COVID-19 pandemic highlighted the difficulties in servicing three communities, many kilometres apart, with limited resources and no clear plan in place as to how to continue to provide great care. It is my hope that all three communities will have a workable plan that will benefit their community, without compromising the safety and well-being of the other communities. We must share our resources and should work together to increase these resources, rather than taking from one to give to the other.

The plans are 'living' plans and can be reviewed and revised when necessary. Some of the goals are not going to be achieved overnight – these are why 'working groups' are being established – to look at complex issues that will require complex solutions.

I would like to thank the municipalities of White River, Dubreuilville and Wawa and the various service providers who work in the communities. It has been an honour and privilege to work with these dedicated individuals.

Acknowledgments

The creation of this plan would not have been possible without the following:

Township of White River	Angelo Bazzoni, Mayor Julie Ward-Roy, CAO Brandi Greenwood, Executive Assistant
Service Providers:	
Superior East Detachment of the Ontario Provincial Police (SE OPP)	Richard Bordin, Detachment Commander Kevin Fellingner, Administrative Sergeant
Canadian Mental Health Association (CMHA)	Emma Blanchet, Case Manager Annette Katajamaki, CEO
Algoma District Services Administration Board (ADSAB)	Anna-Liisa Klockars, Housing Services Supervisor
Northern Neighbor's Nurse Practitioner-Led Clinic (NNNPLC)	Carolyn Burton, Clinic Administrator
Lady Dunn Health Centre	Kadean Ogilvie, CEO Julie Hunter, RAAM Clinic
Chapleau Hornepayne Algoma District Women in Crisis Home (CHADWIC Home)	Paula Valois, Executive Director
Wawa and Area Victim Services (WAVS)	Beverly Boyd, Executive Director Kaitlin Dube, Report Designer

Community Snap Shot

SECTION

3

As a small, northern community White River's concerns are a reflection of the concerns throughout Ontario, albeit on a smaller scale – mental health and addictions and the services available; housing for all family sizes and income levels; policing; and availability of transportation. Working with service providers, and the municipality taking the lead, this plan was developed

White River is a small community located on Highway 17 - the Trans Canada Hwy. White River has a population of 645 people (2016 Census) with an increase in temporary/transient population due to the development of mines and construction in the area. The stable population is aging with approximately 50% of the population being over the age of 50. Children attend elementary school in White River but are bussed to Wawa for secondary school. They are able to access services in Wawa during school hours. Most adults of working age are employed if they wish to be. Industry in the area includes White River Forest Products, Harte Gold Corp. Sugar Zone Mine Site, Barrick Gold Mine, Alamos-Island Gold, Argonaut Gold and Wesdome Gold Mines. Construction of the East-West Tie Transmission Project has resulted in numerous short-term workers in the area.

A list of all the services available can be found in the Appendix: Asset Mapping

CSWB Plan

SECTION

4

Safety and Well-Being Plan

Incident Response – critical and non-critical response

Police, ambulance and fire response are available in the community. A nurse practitioner led clinic is available on weekdays. CHADWIC Home and WAVS are available (located in Wawa) to provide emergency services either virtually or in person as necessary. Other health/social services are available in the community on an intermittent (usually weekly) basis. A number of crisis lines are available 24/7. A complete list of services with descriptions can be found in the Appendix: Asset Mapping

Policing

The Superior East Detachment of the Ontario Provincial Police is located on the east shore of Lake Superior and includes areas in the District of Algoma and District of Sudbury. The geographical area of Superior East Detachment consists of approximately 50,000 square kilometres. The administrative office (Host) is located on Highway 17 in the community of Wawa. Satellite offices include White River, Hornepayne, Chapleau, Wawa Municipal and the newly acquired Foley Detachment (as of October 2020). The Superior East Detachment is responsible for policing the above communities, along with Dubreuilville, Hawk Junction and Missinabie. The Superior East Detachment is also responsible for policing two First Nations communities. The remaining communities are policed by Nishnawbe-Aski Police Service (NAPS). The Trans-Canada Highway is the core that connects all of our communities and is vital to all of its industries, making traffic safety a priority in Superior East. The current complement of officers assigned to the Superior East cluster is 40 Constables, 8 Sergeants and 1 Staff Sergeant (Detachment Commander). Of the 40 constables, 2 are assigned to Court Services, 2 are assigned to the Crime unit (Detective Constables) and 1 is assigned as the Community Safety Officer. All four detachments of the Superior East cluster are duration postings and staffing vacancies are an ongoing challenge.

Ontario passed the Comprehensive Ontario Police Services Act, 2019 (Bill 68) and established the Community Safety and Policing Act, 2019 (CSPA) which, once in force, will repeal the Police Services Act, 1990 (PSA). Section 67 of the CSPA requires there be an Ontario Provincial Police (OPP) detachment board, or more than one OPP detachment board, for each detachment of the OPP that provides policing in a municipality or in a First Nation community. The Ministry is required to develop a regulation related to the composition of each OPP detachment board. To achieve this, the ministry has developed an “OPP Detachment Board Framework”.

CSWB Plan

SECTION

4

Policing

The new OPP Detachment Board Framework will provide civilian governance to 326 municipalities and 43 First Nations including those that:

- Are directly policed by the OPP;
- Employ their own First Nations Constables but receive administrative support from the OPP; and
- Receive “OPP Dedicated” policing (i.e. North Caribou Lake and Wapekeka First Nation).

By enhancing civilian governance, the OPP Detachment Board Framework under the CSPA will:

- Ensure each municipality and First Nation receiving OPP services and supports has an opportunity to represent their local perspectives, needs, and priorities; and
- Provide opportunities for municipalities and First Nations to collaborate on efforts to improve community safety.

The Township of White River will ensure that at least one representative is named to the Superior East OPP Detachment Board.

Fire Response

The community of White River is served by a volunteer fire department which is common in small, rural communities. They are available to assist with, not only fire, but other emergency situations.

Ambulance Response

The community of White River is served by the ADSAB Paramedic Service. An ambulance is available (on-site) 12 hours each day and 12 hours standby. Patients are generally transported to Wawa for emergency care.

CSWB Plan

SECTION

4

Health Clinic

White River is serviced locally by the recently established Northern Neighbours Nurse Practitioner-Led Clinic. Collaboration between NNNPLC, WFHT, & LDHC ensures that residents can receive a full range of primary care services. As with other small, rural communities, residents will have to go to larger centres for specialized care, including obstetrics and oncology.

Risk Intervention – mitigating situation of elevated risk

Mental Health, Addiction and General Health Services

White River is serviced by organizations based in Wawa and/or Sault Ste. Marie with offices in Wawa. A Mental Health and Addictions Table has been working to identify the services available in the area and determine what services need to be enhanced. It is strongly felt that managing and planning of services needs to take place at a local level.

All organizations with a mental health component are having difficulty attracting suitably trained professionals and as a result there is a lack of sufficient staff to support the communities fully. In spite of that, there are some services available, but it isn't clear that residents are aware of the services or how to access them. This has become more readily apparent when services began to be offered virtually rather than in person.

The concerns with mental health and addiction are difficult and will require collaboration between people from the various organizations (CMHA; AFS; NAC; WFHT)

A Situation Table has been established in Wawa as a way to intervene in cases of Acutely Elevated Risk. Many of the people on this table would also be members of a White River Situation Table, should one be established. Involvement from professionals in White River would be necessary.

The township will establish a working group that will review the services and determine what (if any) other services are required and a plan to increase services as necessary.

The working group will also develop a communications strategy to ensure that residents are well aware of the availability of service.

A list of current services available will be developed and provided to the township who will disseminate the information to the community.

A Situation Table will be established for White River.

The White River Emergency Foodbank is open two (2) afternoons each week.

CSWB Plan

SECTION

4

Prevention – proactively reducing identified risks**Housing**

White River is experiencing a growth in population due to mining and power distribution activity in the area. A number of bunkhouses have been established and motels are filled to capacity. For workers this may mean that they have to share apartments or rooms with a number of others, and/ or may be living away from family for an extended period of time as there are no homes available to purchase or suitable apartments for rent. This is likely to result in individual, family and generally social stresses. The pandemic has added to the stress as people cannot congregate and restaurants are often not open for indoor dining.

Should other service providers (private practice/businesses, mental/physical health providers) wish to relocate to White River there are no homes available to purchase.

Currently the ADSAB board has one person representing Hornepayne, White River and Dubreuilville.

The issues with insufficient housing are complex and require more thought than a well-being plan can provide.

The township will establish a working group to determine the needs and the best way for fulfilling these needs. It is anticipated that those who should be represented on the committee include; the Township of White River, Aboriginal Housing, Algoma District Services Board, White River's Economic Development Office and Industry / Business.

The township will seek to have their own representative on the ADSAB board.

CSWB Plan

SECTION

4

Social Development - promoting and maintaining community safety and well-being**Transportation – local and regional**

Residents who wish to go either north or south have access to the Ontario Northland Bus 6 days a week. Should they need to go to Wawa for any reason they could, theoretically take a bus in the morning and return in the afternoon. Once in Wawa they would either have to take a taxi or walk to their various appointments. This may be difficult for the elderly or people with young children.

There is no taxi service in White River. For those residents who are unable to walk more than a kilometre, especially in the winter, this can be problematic. Going to the grocery store, the medical clinic, or to visit a friend, may not be possible. Elderly people can quickly become home bound.

White River has an established transportation program which they are currently revamping and they will continue to work to develop and enhance the program.

The group is examining the feasibility of extended the service regionally – i.e., developing a schedule perhaps weekly for going to Wawa. They are also seeking to establish a pool of volunteers to increase the availability of transportation within the community. The maintenance and insuring of the van must be included in the plan.

As the motels are filled to capacity there are no rooms available for travellers, (some who may be unable to continue on due to vehicle issues). It is also a concern for transients who are dropped off in White River and are unable to get a ride out of town. In the winter it is the cold temperature and in the summer the black flies and mosquitoes that are especially concerning.

The township will work with Wawa and Area Victim Services in developing a protocol for getting stranded travellers from White River to Wawa or elsewhere when required. The transportation program may form part of this protocol.

Survey Results

Comments:

Tell us why you think your community is safe or not:

"low crime but drug problem in the community (not much being done)"

"Safe, friendly, helpful place"

"Inadequate Health Care Services, Inadequate Grocery and Retail Outlets"

"Do not notice how bad things are until they make the news"

"Too much impaired driving"

"Everyone knows everyone, if something is wrong most of the time the neighbour will notice"

"I see police patrolling from time to time. Left items outside home overnight and vehicles not in the garage with no incidents"

Overall, would you describe your community as a healthy community:

"Drug dealing in community. Need access locally to more specified health care services ie massage therapist, chiropractor, etc."

"I worry about drug addiction"

"There is no recycling"

"Lack of Local Services such as Mental Health, Dental Services, and Physio therapy. No support for individuals being stranded in community."

Survey Results

Comments:

Please tell us what changes or improvements you think would make your community a safer/healthier place to live:

"See police here more often stop fast drivers and drug abuse"

"Our own drug store/pharmacy, more retail stores, chiropractor, massage therapist, reflexologist, attract other services: electricians, appliance repair"

"If people in the community would listen to some of the things going on in this town and make a better committed need!"

"Getting rid of drugs (very hard to do)"
